## N64 EXPANSION PAK

The N64 Expansion Pak is a special cartridge that contains 4 Megabytes (MB) of memory. When inserted into the Memory Expansion slot on the top of the N64, memory is added directly to the N64's existing 4 MB of memory, bringing the total up to 8 MB of main memory.

Only N64 Game Paks displaying the N64 Expansion Pak icon will take advantage of the additional memory features of the N64 Expansion Pak. Look for this icon on specially designed games.
