YOU'RE IN A WORLD OF HURT.

Things are looking bad for a peaceful cluster of worlds in the Illis solar system. One of their reconnaissance satellites has picked up an evil presence 1.2 light years away - and it's drawing closer. The dark Armada of Annihilation pulses forward, devouring all the planets in its way, their vast array of weaponry poised and ready for any massive army that may try to stop them. However, it may not be a large force that can defeat them, but rather a force of one.

HOW TO PLAY

Get into your flame retardant combat suit, strap into the cockpit of the Axelay stratafighter, and stand by to launch into six sanity crushing worlds. And they're all occupied by the Armada of Annihilation. You need to go in and recapture Axelay's secret weapons taken by the enemy. If you happen to escape with your life, an evil mega machine waits for you at the end of each stage. It's enough to give you terminal space sickness.

WORLDS OF WAR

Your one warrior conquest will cover six war torn worlds.

Your mission: Conquer each planet and recapture the secret weapons of Axelay.

CUMULUSES

A planet covered in clouds. Due to its low gravitational force, the Armada of Annihilation is able to build a vast floating fortress as its front line of defense.

TRALIEB COLONY

This planet once contained an Illis Defence Forces research facility where new weapon development took place. After it was overrun by the Armada of Annihilation, the research facility was used to build an evil array of weaponry.

URBANITE

The entire population of this planet was enslaved by the Armada of Annihilation. The reason for attack on this peaceful world is unclear other than the fact that the Armada is a merciless force.

THE CAVERN

Once a beautiful planet covered with plant life, its temperature, water, and life forms have been affected by radiation seeping from Armada weapons plants.

SECTOR 3 LAVA PLANET

Once a planet with an active volcano, the Armada of Annihilation built a plant to harness the energy. As a result, the planet's core split and flooded the surface with lava.

THE ARMADA OF ANNIHILATION'S FORTRESS

This is the heart of the dark empire. It is thought to be heavily fortified with exotic weaponry. But no one knows for sure because anyone who has been inside has never escaped alive.

STAGE TERMINATORS

THE ARACHNATRON

Engineered to intimidate the enemy so much that they freeze up from fear.

T-36 TOWBAR

Designed for maximum destructive power, the T-36 Towbar has a forward mounted two megaton cannon and laser that disintegrates anything upon contact.

REGENERTOID

An ominous machine that grows when attacked. It has never been defeated.

AQUADON

A nearly impenetrable, floating fortress of devastation. It covers its enemies in a hail of lightning.

WAYLER

The Wayler is a ruthless freak of nature composed of lava and metal. If his fireballs don't get you, his punishing fists will.

VEINION

There is no data on this life force. You will be the first to know what horror it's capable of.

ASSORTED ARMADA ARMAMENTS

GORAN

Large fighter equipped with two remote controlled satellites.

BYTREX

Short distance attacker armed with missiles and an energy laser.

STROPOFORE

Unusual aquatic insect. Defects in its DNA structure have prevented it from metamorphosing.

POLARIS

Medium sized anti-aircraft weapon. Pods open on both sides to release psycho sanders.

ZEXTANT

Medium sized battle satellite that puts up a rock solid shield and fires an extremely powerful laser.

GRAVITRON

Ultra high speed combat bomber. Circles above enemies and drops anti-gravitation mines.
