Prologue

The setting: medieval Transylvania. Several hundred years have passed since legendary hero Simon Belmont defeated the evil Count Dracula and sealed him away for what was supposed to be eternity. The people have long since forgotten about the horror of the undead, thus allowing a few depraved individuals to restore the Prince of Darkness to his former state; sleeping in his coffin by day and preying upon hapless victims by night.

Dracula now plans to get revenge on his old enemy through his descendants by locking Annet, the girlfriend of Belmont's great grandson, Richter, and her sister, Maria, in his dark and gloomy castle.

Once aware of this, Richter takes his ancestor's sacred whip, passed down through the years from father to son, and sets out for Dracula's castle to rescue Annet and Maria, and to seal away the evil Count for good.

How to Play

Rescue Annet and Maria from Dracula's sinister castle, and entomb the evil Count so his undead minions walk among mortals no more!

- ⊗ Defeat attacking ghouls with the whip and special weapons to proceed through the game.
- ⊗ Items appear when you destroy a candle or defeat an opponent. Receiving an item increases your power and enables the use of special weapons, etc. (See *item list*, page 13)
- ⊗ Stages are divided into several areas. The enemy boss waits in the last area. When the boss is defeated, a mystic sphere appears. The stage is cleared when you get the mystic sphere.
- ⊗ Life decreases each time a player is damaged. If a player's life runs out, or if he falls into a bottomless pit, etc., the player loses a life.
- ⊗ As long as you still have at least one player left, you can continue playing from the beginning of the area where you last lost a life. The game ends when you run out of players. Even if the game ends, you can opt to CONTINUE playing from the beginning of the stage in which you were defeated.
